

Optional Sinkhole Coverage Inspection Requirements

Certain zip codes and counties require a structural inspection of the home before Sinkhole Coverage may be approved for HO-3, HO-6 and DP-3 policies.

Policies written in these areas may only be bound with Catastrophic Ground Cover Collapse Coverage. If the policyholder elects the option for Sinkhole Coverage, an approved structural inspection must be completed prior to adding the coverage. The inspection will document existing damage, evaluate structural integrity of the dwelling, and verify that there is no current or proximate sinkhole activity that has not been disclosed. Optional Sinkhole Coverage will be approved for those homes that do not display characteristics associated with sinkhole damage.

The policyholder will contract directly with our approved inspection service and pay an arranged fee (\$90) which is one half of the amount we have negotiated with the inspection service. We will pay the other half, and both parties will receive a copy of the inspection. The fee is not refundable.
